⁰TaG Junior is a local option class for FKCS. A **25MM 30MM** exhaust restrictor is required for all listed motors. Motors with no weight will be evaluated for performance advantage or disadvantage and subsequent modifications may be implemented during the course of the season.

¹ALL TaG Drivers will be **REQUIRED** to declare their engine at registration; This information is used at the scales so you need to make sure this is correct.

²Shifters classes run SKUSA 2009-2010 rules for tech only, race format and points is WKA Manufacturer Cup.

³Some weights are subject to change from the published rules by the discretion of the FKCS board or Race Director if classes are combined and scored together. If class is eligible for national transfer points then driver must declare the national class weight to which they want points counted toward (Lite, Medium, Heavy) on the WKA points transfer form.
