

How to use *Race Monitor* to view live Timing and Scoring on your iPhone or Android based phone

Race Monitor (www.race-monitor.com) is a small \$4.99 app that you download to your iPhone or Android based phone that works with the FKCS timing and scoring system and allows fans and or race teams to view the live timing and scoring as a race is taking place. The Race Monitor app will actually show the live timing and scoring as it happens.

Where do I get Race Monitor for my iPhone?

- From your iPhone got to iTunes and search apps for *Race Monitor* and download the app.

Requirements: Compatible with iPhone, iPod touch, and iPad. Requires iOS 3.0 or later

Where do I get Race Monitor for my Android Phone?

- Search the Android Market for *Race Monitor* or go to the following address to download:
market://search?q=pname:com.karttuner.racemonitor

How do I connect?

1. Start the application and tap on the Directory button on the main page. If you do not see the "Directory", you will need to update your app. Go back to your app store and get the free upgrade.
2. Search thru the directory for the current FKCS Live event.
3. Tap the event description and that's it!

Is there a way that I can test Race Monitor?

There is a test server running a test loop of data from a race at Sebring. To connect, make sure that you are connected to the internet and use the following information:

IP Address: 216.241.166.28 **Port:** 50000

We hope fans and teams take advantage of this new technological advance at each FKCS event. Please let us know how the system is working out.

Limited support on race days is available, so if you need help getting your system up and running see our Timing and Scoring staff on Fridays.
